

AL HF (High Flow)

APPLICATION

A special Pneutronic has been developed for this application, a HIGH FLOW version capable of sustaining a high speed in checking large tires pressure. As an automatic device, Pneutronic allows the user to operate other functions at the same time of checking the tire, reducing man labor cost.

Working range	4-160 psi	0,27-10 bar
Incoming pressure	150-175 psi	10-12 bar
Weight	4,6 kg	13 pounds
Size	45x32x13cm	17"x12"x5"
Max. Power Consumption		20 Watts
Power Consumption Out of Regime		5 Watts
Operating Temperature		-10 to +50 C °
Accuracy		<1%
Nitrogen Compability		Total
