

The market is growing and we want you to increase your sales. Let us help you! Whatever we can do to help will be gracefully welcomed. Call us, send us an e-mail, or whatever, but keep us in your mind.

**Pneutronic** is easy to sell and we are sure you are the right person at the right time to do so!

Use Pneutronic frequently!  
It is easy, safe and precise.  
Don't let your tires unassisted!

### How to Inflate Your Tires

**STEP 1:** Go to a gas station or garage that has pressurized air with a Pneutronic Tire Gauge.

**STEP 2:** Park your car so you can reach all four tires with the air hose.

**STEP 3:** Find the air-pressure specifications for your car's tires (it may be found in the driver's door).

**STEP 4:** Choose the desired pressure value using the buttons - and +.

**STEP 5:** Unscrew the plastic cap on the air valve. Put it in your pocket so you don't lose it.

**STEP 6:** Connect the nozzle to the tire.

**STEP 7:** Wait for the beep.

**STEP 8:** Remove the nozzle from the tire that has been calibrated and repeat the process with any other tire.

You can push the  button for flat tires.
